OVERVIEW OF MEASURES OUT FOR PUBLIC COMMENT

PROPOSED CHANGES TO EXISTING HEDIS MEASURES

PROPOSED NEW HEDIS MEASURES

PROPOSED NEW MEASURES FOR DIABETES RECOGNITION PROGRAM

Agenda

Public Comment Overview

Proposed Changes to Existing HEDIS Measures

Social Need Screening and Intervention (SNS-E)

Adult Immunization Status (AIS-E)

Lead Screening in Children (LSC-E)

Follow-Up After High-Intensity Care for Substance Use (FUI)

Statin Therapy for Patients With Cardiovascular Disease (SPC)

Statin Therapy for Patients With Diabetes (SPD)

Proposed New HEDIS Measures

Tobacco Use Screening and Cessation Intervention (TSC-E)

Follow-Up After Acute Care Visits for Asthma (AAF-E)

Disability Description of Membership (DDM)

HEDIS Measure Retirement

Asthma Medication Ratio (AMR)

Cross-Cutting Item for HEDIS

Alignment with Updated Federal Standards for Race and Ethnicity

Proposed New Measures for the Diabetes Recognition Program

Statin Therapy Prescription

Depression Screening and Follow-Up

Continuous Glucose Monitoring Utilization

Have you participated in NCQA public comment on measures in the past?

- A. Yes, I submit comments nearly every year.
- B. Yes, I have submitted comments once or twice.
- C. No, but I do participate in the CMS Core set public comment process.
- D. No, I have never submitted comments on NCQA measures.

Proposed HEDIS Updates

Proposed Changes to Existing HEDIS Measures

Measurement Year 2026

Measure	Proposed Changes	Product Line
Social Need Screening and Intervention (SNS- E)	 Add G0136 Assessment Code to the Screening Numerator Add Z Codes to Intervention Denominator Add G codes (G0019, G0023, G0140) to the Intervention Numerator Remove "Assessments" from the Intervention Numerator 	Commercial Medicaid Medicare
Adult Immunization Status (AIS-E)	Proposed addition of the COVID-19 status indicator	Commercial Medicaid Medicare
Lead Screening in Children (LSC-E)	Transition measure to ECDS-only reporting	Medicaid
Follow-Up After High- Intensity Care for Substance Use (FUI)	 Numerator: Allow a Substance Abuse Disorder (SUD) diagnosis in any diagnosis position Add peer support services as a follow-up option Remove pharmacotherapy dispensing events as a follow-up 	Commercial Medicaid Medicare

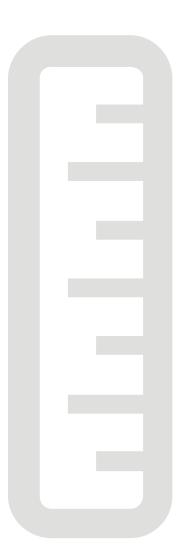

Which measures do you currently or plan to use in your quality evaluation or incentive programs:

- A. Social Need Screening and Intervention (SNS-E)
- B. Adult Immunization Status (AIS-E)
- C. Lead Screening in Children (LSC-E)
- D. Follow-Up After High Intensity Care for Substance Use (FUI)

Proposed Measure Retirement

Measurement Year 2026

Asthma Medication Ratio (AMR)

Measure Description: Assesses the percentage of members ages 5-64 with persistent asthma who had a ratio of controller medications to total asthma medications of 0.50 or greater during the measurement year.

Product Lines: Commercial, Medicaid

Reporting Method: Administrative

Exclusions: None

Do you support the retirement of Asthma Medication Ratio (AMR)?

- A. Support retirement
- B. Do not support retirement
- C. I need more information
- D. No opinion

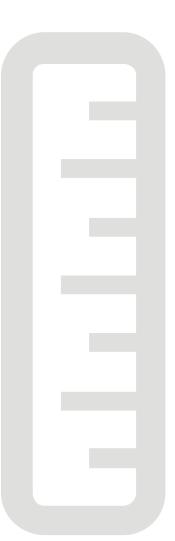

Proposed New Measures

Polina Lissin, Senior Health Care Analyst

Tobacco Use Screening and Cessation Intervention

Measure Description

Measure Description: Percentage of persons 12 years of age and older who were screened for tobacco use one or more times during the measurement period AND who received tobacco cessation intervention during the measurement period or the 180 days prior to the measurement period if identified as a tobacco user. Two rates are reported:

- Tobacco Use Screening Performance Rate
- Cessation Intervention Performance Rate

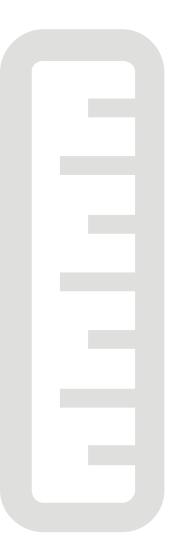

Product Line: Medicare, Medicaid, and Commercial

Reporting Method: Electronic Clinical Data System (ECDS)

Exclusions: Hospice and death

Follow-Up After Acute Care Visits for Asthma

Measure Description

Measure Description: The percentage of acute urgent care, emergency department (ED) or hospitalizations (inpatient and observation stays) for persons 5-64 years of age with a principal diagnosis of asthma that had a corresponding outpatient follow-up visit within 30 days.

Product Line: Commercial, Medicaid

Reporting Method: Electronic Clinical Data System (ECDS)

Exclusions: Death; hospice; diagnosis of acute respiratory failure, emphysema or cystic fibrosis

Disability Description of Membership

Measure Description

Measure Description: Describes the disability status of members 15 years of age and older enrolled any time during the measurement year, including information by data source and disability type.

- o Data Source: Self-Reported Questionnaire, Accommodations, Enrollment Data
- Disability Type: Hearing, Seeing, Concentrating, Walking, Dressing or Bathing,
 Completing Errands, Communicating, Other Disability Type

Product Lines: Commercial, Medicaid, Medicare

Reporting Method: Administrative

Exclusions: None

New Measures for the Diabetes Recognition Program

Gabby Kyle-Lion, Senior Health Care Analyst

Diabetes Recognition Program

Program Description

Launched in 1997 to recognize *clinicians* delivering high-quality diabetes care.

Currently undergoing a **refresh**, including **new measure development**.

Measure Set – Updated Fall 2023

Glycemic Status Assessment <8.0%

Glycemic Status Assessment >9.0%

Blood Pressure Control <140/90 mmHg

Eye Examination

Foot Examination

Kidney Health Evaluation

Smoking and Tobacco Use Screening and Follow-Up

Annual recognition

Population-based, or random sample of 250

Digital specifications in CQL with FHIR standards

Statin Therapy Prescription

Depression Screening and Follow-Up

Continuous Glucose Monitoring Utilization *

Statin Therapy Prescription

Measure Description

Measure Description: The percentage of patients 40–75 years of age with diabetes and evidence of statin therapy during the measurement period.

Universal Exclusions: Death, hospice, palliative care, long-term nursing home, frailty with advanced illness.

Measure-Specific Exclusions: <40, pregnancy, IVF, clomiphene, ESRD, dialysis, cirrhosis, muscular pain and disease, muscular reactions to statins.

Level of Accountability: Clinician (*Diabetes Recognition Program*).

Depression Screening and Follow-Up

Measure Description

Measure Description: The percentage of patients 18–75 years of age with diabetes who received appropriate depression screening and follow-up during the measurement period. *Two rates are reported:*

- Individuals who were screened and had a negative result and no positive results for clinical depression during the measurement period, or
- 2. Individuals who were screened, had a positive result for clinical depression during the measurement period and received appropriate follow-up.

Universal Exclusions: Death, hospice, palliative care, long-term nursing home, frailty with advanced illness.

Measure-Specific Exclusions: Bipolar disorder, depression.

Level of Accountability: Clinician (*Diabetes Recognition Program*).

Continuous Glucose Monitoring Utilization

Measure Description

Measure Description: The percentage of patients 18–75 years of age with diabetes who utilized continuous glucose monitoring (CGM) during the measurement period. *Two rates are reported:*

- 1. Individuals with type 1 diabetes and evidence of CGM use during the measurement period.
- 2. Individuals with diabetes, minus rate 1, with use of basal insulin, multiple daily injections or continuous insulin infusion and evidence of CGM use during the measurement period.

Universal Exclusions: Death, hospice, palliative care, long-term nursing home, frailty with advanced illness.

Level of Accountability: Clinician (*Diabetes Recognition Program*).

Are you familiar with the NCQA Diabetes Recognition Program (DRP)?

- A. Yes, I am very familiar
- B. A little bit—I've heard of it
- C. I am not familiar, but I'd like to learn more
- D. I am not familiar, and I am not interested

HEDIS® PUBLIC COMMENT

NCQA is releasing for public comment proposed new measures, changes to existing measures and measure retirements for HEDIS, as well as new measures for inclusion in the Diabetes Recognition Program. NCQA acknowledges that the health care policy environment is rapidly evolving at this time. NCQA will take into account all comments received and the evolving environment as NCQA moves forward to prepare the final versions of these measures.

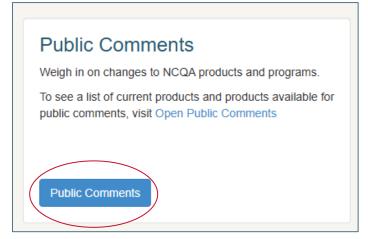

Reviewers are asked to submit comments in writing via the NCQA public comment website by **5:00 pm** (ET), Thursday, March **13**.

PUBLIC POLICY NOTES

NCQA's Proposed Timeline for Retiring and Replacing HEDIS® Hybrid Measures

We're working with health care organizations to fully transition HEDIS reporting to digital format by MY 2030.

Our goal: Improve the accuracy, timeliness, actionability and affordability of quality measurement by shifting all measures to the ECDS and FHIR®/CQL digital formats.

NCQA plans to eliminate the hybrid reporting method by MY 2029. Learn more about the transition plan for the eight HEDIS measures that currently allow hybrid reporting.

Tennessee Recognizes the Vital Role of Community Health Workers

Community health workers (CHWs) are essential in connecting people to health care and social services.

While many states have certification programs for CHWs, there are no national standards for the organizations that employ them.

Discover how the Tennessee Community Health Worker Association, with support from the state's Medicaid program (TennCare) and NCQA, launched an accreditation program aimed at achieving high-quality outcomes for CHWs and the communities they serve.
