### **HEDIS Measures/Stratifications That Will Not Be Publicly Reported for MY 2025**

The following first-year and first-year status measures, product lines and indicators will not be publicly reported for MY 2025:

- Topical Fluoride for Children (TFC)\*
- Acute Hospital Utilization (AHU)—Medicaid
- Documented Assessment After Mammogram (DBM-E)
- Follow-Up After Abnormal Mammogram Assessment (FMA-E)
- Blood Pressure Control for Patients With Hypertension (BPC-E)
- Adult Immunization Status (AIS-E)—Hepatitis B Immunization Indicator
- Social Need Screening and Intervention (SNS-E)\*\*

### **Medicare Socioeconomic Status Stratifications Will Not Be Publicly Reported for These Measures for MY 2025**

- |   |                                       |
|---|---------------------------------------|
| • Eye Exam for Patients With Diabetes (EED) | • Breast Cancer Screening (BCS-E)     |
| • Plan All-Cause Readmissions (PCR)         | • Colorectal Cancer Screening (COL-E) |

*\*TFC will remain in first-year status as NCQA continues to evaluate the evidence and stakeholder feedback for how to best capture the quality of dental care provided to children.*

*\*\*NCQA will not publicly report SNS-E measure in MY 2025, but encourages health plans to continue to enhance their capacity to collect and report these critical social data, which play a vital role in improving health outcomes. NCQA looks forward to engaging with stakeholders and collaborating to facilitate reporting across product lines and increasing interoperability capabilities across diverse data systems.*
