

October 1, 2024

This HEDIS^{®1} Measurement Year (MY) 2024 Public Reporting memo outlines all measures, product lines and indicators approved for public reporting starting in MY 2024, in addition to all measures, stratifications and product lines that will not be publicly reported for MY 2024.

If you have questions about the information within the tables, contact us through [My NCQA](#).

Measurement Year	HEDIS Measures/Stratifications That Will Be Publicly Reported
2024	<p>The following first-year and first-year status measures, product lines and indicators will be publicly reported for MY 2024:</p> <ul style="list-style-type: none"> • Oral Evaluation, Dental Services (OED) • Deprescribing of Benzodiazepines in Older Adults (DBO) • Emergency Department Visits for Hypoglycemia in Older Adults With Diabetes (EDH) • Cervical Cancer Screening (CCS-E)
2024	<p>The following measures reported using Electronic Clinical Data Systems (ECDS) will be publicly reported for MY 2024 for all product lines and indicators:</p> <ul style="list-style-type: none"> • Childhood Immunization Status (CIS-E) • Immunizations for Adolescents (IMA-E) • Breast Cancer Screening (BCS-E) • Colorectal Cancer Screening (COL-E) • Follow-Up Care for Children Prescribed ADHD Medication (ADD-E) • Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E)
2024	<p>The race and ethnicity stratifications will be publicly reported as aggregate performance distributions (not plan-level results) for the following measures:</p> <ul style="list-style-type: none"> • Immunizations for Adolescents (IMA, IMA-E) • Asthma Medication Ratio (AMR) • Follow-Up After Emergency Department Visit for Substance Use (FUA) • Pharmacotherapy for Opioid Use Disorder (POD) • Initiation and Engagement of Substance Use Disorder Treatment (IET) • Well-Child Visits in the First 30 Months of Life (W30) • Breast Cancer Screening (BCS-E) • Colorectal Cancer Screening (COL-E)* • Adult Immunization Status (AIS-E)

Measurement Year	HEDIS Measures/Stratifications That Will Be Publicly Reported
	Benchmarks will capture performance distributions for the race and ethnicity stratification in each measure, with plan-level performance aggregated by product line and (potentially) other characteristics such as geographic region.

*The traditional version of the Colorectal Cancer Screening (COL) was retired as of MY 2024. The ECDS reported version of the measure (COL-E) and the race/ethnicity stratifications for COL-E will be publicly reported as of MY 2024.

Measurement Year	HEDIS Long-Term Service and Supports (LTSS) Measures That Will Be Publicly Reported
2024	<ul style="list-style-type: none"> • Comprehensive Assessment and Update (LTSS-CAU) • Comprehensive Care Plan and Update (LTSS-CPU) • Shared Care Plan with Primary Care Practitioner (LTSS-SCP) • Reassessment/Care Plan Update After Inpatient Discharge (LTSS-RAC)

Measurement Year	HEDIS Measures/Stratifications That Will Not Be Publicly Reported
2024	<ul style="list-style-type: none"> • Topical Fluoride for Children (TFC)* • Social Need Screening and Intervention (SNS-E)*

*TFC, introduced in HEDIS MY 2023, has undergone its first-year analysis. The results of the first-year analysis highlighted the need to better understand dental service coding practice and how topical fluoride services for children are rendered state to state. This measure will remain in first-year status as NCQA continues to evaluate the evidence and stakeholder feedback for how to best capture the quality of dental care provided to children.

SNS-E, introduced in the HEDIS MY 2023, has undergone its first-year analysis. As with many new measures, additional time is needed for the field to evolve and for health systems to strengthen their data infrastructure, particularly for capturing social data elements related to unmet food, housing and transportation needs. Consequently, NCQA will not publicly report this measure in MY 2024. However, we strongly encourage health plans to continue to enhance their capacity to collect and report these critical social data, which play a vital role in improving health outcomes. NCQA looks forward to engaging with stakeholders and collaborating to facilitate reporting across product lines and increasing interoperability capabilities across diverse data systems.

Measurement Year	Race and Ethnicity Stratifications Will Not Be Publicly Reported for These Measures
2024	<ul style="list-style-type: none"> • Eye Exam for Patients With Diabetes (EED) • Kidney Health Evaluation for Patients With Diabetes (KED) • Follow-Up After Hospitalization for Mental Illness (FUH) • Follow-Up After Emergency Department Visit for Mental Illness (FUM) • Childhood Immunization Status (CIS-E) • Cervical Cancer Screening (CCS-E)

Measurement Year	Race and Ethnicity Stratifications Will Not Be Publicly Reported for These Measures
	<ul style="list-style-type: none"> • Prenatal Immunization Status (PRS-E) • Prenatal Depression Screening and Follow-Up (PND-E) • Postpartum Depression Screening and Follow-Up (PDS-E)

Measurement Year	Medicare Socioeconomic Status Stratifications Will Not Be Publicly Reported for These Measures
2024	<ul style="list-style-type: none"> • Eye Exam for Patients With Diabetes (EED) • Plan All-Cause Readmissions (PCR) • Breast Cancer Screening (BCS-E) • Colorectal Cancer Screening (COL-E)
