

Follow-Up After Hospitalization for Mental Illness (FUH)

SUMMARY OF CHANGES TO HEDIS MY 2024

- Added instructions to report rates stratified by race and ethnicity for each product line.

Description

The percentage of discharges for members 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health provider. Two rates are reported:

1. The percentage of discharges for which the member received follow-up within 30 days after discharge.
2. The percentage of discharges for which the member received follow-up within 7 days after discharge.

Eligible Population

Product lines	Commercial, Medicaid, Medicare (report each product line separately).
Stratifications	<p>For each product line, report the following stratifications by race and total, and stratifications by ethnicity and total:</p> <ul style="list-style-type: none"> • <i>Race</i>: <ul style="list-style-type: none"> – American Indian or Alaska Native. – Asian. – Black or African American. – Native Hawaiian or Other Pacific Islander. – White. – Some Other Race. – Two or More Races. – Asked But No Answer. – Unknown. – Total. • <i>Ethnicity</i>: <ul style="list-style-type: none"> – Hispanic or Latino. – Not Hispanic or Latino. – Asked But No Answer. – Unknown. – Total. <p>Note: <i>Stratifications are mutually exclusive, and the sum of all categories in each stratification is the total population.</i></p>
Ages	6 years and older as of the date of discharge. Report three age stratifications and a total rate:

- 6–17 years.
- 18–64 years.
- 65 years and older.
- Total.

The total is the sum of the age stratifications.

Continuous enrollment

Date of discharge through 30 days after discharge.

Allowable gap

None.

Anchor date

None.

Benefits

Medical and mental health (inpatient and outpatient).

Event/diagnosis

An acute inpatient discharge with a principal diagnosis of mental illness or intentional self-harm (Mental Illness and Intentional Self-Harm Value Set) on the discharge claim on or between January 1 and December 1 of the measurement year. To identify acute inpatient discharges:

1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set).
2. Exclude nonacute inpatient stays (Nonacute Inpatient Stay Value Set).
3. Identify the discharge date for the stay.

The denominator for this measure is based on discharges, not on members. If members have more than one discharge, include all discharges on or between January 1 and December 1 of the measurement year.

**Acute
readmission or
direct transfer**

Identify readmissions and direct transfers to an acute inpatient care setting during the 30-day follow-up period:

1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set).
2. Exclude nonacute inpatient stays (Nonacute Inpatient Stay Value Set).
3. Identify the admission date for the stay (the admission date must occur during the 30-day follow-up period).
4. Identify the discharge date for the stay.

Exclude both the initial discharge and the readmission/direct transfer discharge if the last discharge occurs after December 1 of the measurement year.

If the readmission/direct transfer to the acute inpatient care setting was for a principal diagnosis (use only the principal diagnosis on the discharge claim) of mental health disorder or intentional self-harm (Mental Health Diagnosis Value Set; Intentional Self-Harm Value Set), count only the last discharge.

If the readmission/direct transfer to the acute inpatient care setting was for any other principal diagnosis (use only the principal diagnosis on the discharge claim), exclude both the original and the readmission/direct transfer discharge.

**Nonacute
readmission or
direct transfer**

Exclude discharges followed by readmission or direct transfer to a nonacute inpatient care setting within the 30-day follow-up period, regardless of the principal diagnosis for the readmission. To identify readmissions and direct transfers to a nonacute inpatient care setting:

1. Identify all acute and nonacute inpatient stays (Inpatient Stay Value Set).
2. Confirm the stay was for nonacute care based on the presence of a nonacute code (Nonacute Inpatient Stay Value Set) on the claim.

3. Identify the admission date for the stay.

These discharges are excluded from the measure because rehospitalization or direct transfer may prevent an outpatient follow-up visit from taking place.

Required exclusions

Exclude members who meet either of the following criteria:

- Members who use hospice services (Hospice Encounter Value Set; Hospice Intervention Value Set) or elect to use a hospice benefit any time during the measurement year. Organizations that use the Monthly Membership Detail Data File to identify these members must use only the run date of the file to determine if the member elected to use a hospice benefit during the measurement year.
- Members who die any time during the measurement year.

Administrative Specification

Denominator The eligible population.

Numerators

30-Day Follow-Up A follow-up visit with a mental health provider within 30 days after discharge. Do not include visits that occur on the date of discharge.

7-Day Follow-Up A follow-up visit with a mental health provider within 7 days after discharge. Do not include visits that occur on the date of discharge.

For both indicators, any of the following meet criteria for a follow-up visit.

- An outpatient visit (Visit Setting Unspecified Value Set) **with** (Outpatient POS Value Set) **with** a mental health provider.
- An outpatient visit (BH Outpatient Value Set) **with** a mental health provider.
- An intensive outpatient encounter or partial hospitalization (Visit Setting Unspecified Value Set **with** POS code 52).
- An intensive outpatient encounter or partial hospitalization (Partial Hospitalization or Intensive Outpatient Value Set).
- A community mental health center visit (Visit Setting Unspecified Value Set; BH Outpatient Value Set; Transitional Care Management Services Value Set) **with** POS code 53.
- Electroconvulsive therapy (Electroconvulsive Therapy Value Set) **with** (Outpatient POS Value Set; POS code 24; POS code 52; POS code 53).
- A telehealth visit: (Visit Setting Unspecified Value Set) **with** (Telehealth POS Value Set) **with** a mental health provider.
- Transitional care management services (Transitional Care Management Services Value Set) **with** a mental health provider.
- A visit in a behavioral healthcare setting (Behavioral Healthcare Setting Value Set).
- A telephone visit (Telephone Visits Value Set) **with** a mental health provider.

- Psychiatric collaborative care management (Psychiatric Collaborative Care Management Value Set).

Note

- *Organizations may have different methods for billing intensive outpatient visits and partial hospitalizations. Some methods may be comparable to outpatient billing, with separate claims for each date of service; others may be comparable to inpatient billing, with an admission date, a discharge date and units of service. Organizations whose billing methods are comparable to inpatient billing may count each unit of service as an individual visit. The unit of service must have occurred during the required period for the rate (e.g., within 30 days after discharge or within 7 days after discharge).*
- *Refer to Appendix 3 for the definition of mental health provider. Organizations must develop their own methods to identify mental health providers. Methods are subject to review by the HEDIS auditor.*

Data Elements for Reporting

Organizations that submit HEDIS data to NCQA must provide the following data elements.

Table FUH-A-1/2/3: Data Elements for Follow-Up After Hospitalization for Mental Illness

Metric	Age	Data Element	Reporting Instructions
FollowUp30Day	6-17	Benefit	Metadata
FollowUp7Day	18-64	EligiblePopulation	For each Stratification, repeat per Metric
	65+	ExclusionAdminRequired	For each Stratification, repeat per Metric
	Total	NumeratorByAdmin	For each Metric and Stratification
		NumeratorBySupplemental	For each Metric and Stratification
		Rate	(Percent)

Table FUH-B-1/2/3: Data Elements for Follow-Up After Hospitalization for Mental Illness: Stratifications by Race

Metric	Race	Source	Data Element	Reporting Instructions
FollowUp30Day	AmericanIndianOrAlaskaNative	Direct	EligiblePopulation	For each Stratification, repeat per Metric
FollowUp7Day	Asian	Indirect	Numerator	For each Metric and Stratification
	BlackOrAfricanAmerican	Unknown**	Rate	(Percent)
	NativeHawaiianOrOtherPacificIslander	Total		
	White			
	SomeOtherRace			
	TwoOrMoreRaces			
	AskedButNoAnswer*			
	Unknown**			

Table FUH-C-1/2/3: Data Elements for Follow-Up After Hospitalization for Mental Illness: Stratifications by Ethnicity

Metric	Ethnicity	Source	Data Element	Reporting Instructions
FollowUp30Day	HispanicOrLatino	Direct	EligiblePopulation	For each Stratification, repeat per Metric
FollowUp7Day	NotHispanicOrLatino	Indirect	Numerator	For each Metric and Stratification
	AskedButNoAnswer*	Unknown**	Rate	(Percent)
	Unknown**	Total		

*AskedButNoAnswer is only reported for Source= "Direct."

**Race/Ethnicity= "Unknown" is only reported for Source= "Unknown" and Source= "Unknown" is only reported for Race/ Ethnicity= "Unknown."

Rules for Allowable Adjustments of HEDIS

The “Rules for Allowable Adjustments of HEDIS” (the “Rules”) describe how NCQA’s HEDIS measure specifications can be adjusted for other populations, if applicable. The Rules, reviewed and approved by NCQA measure experts, provide for expanded use of HEDIS measures without changing their clinical intent.

Adjusted HEDIS measures *may not* be used for HEDIS health plan reporting.

Rules for Allowable Adjustments of Follow-Up After Hospitalization for Mental Illness

NONCLINICAL COMPONENTS		
Eligible Population	Adjustments Allowed (Yes/No)	Notes
Product lines	Yes	Organizations are not required to use product line criteria; product lines may be combined and all (or no) product line criteria may be used.
Ages	Yes	The age determination dates may be changed (e.g., select, “age as of June 30”). Changing the denominator age range is allowed.
Continuous enrollment, allowable gap, anchor date	Yes	Organizations are not required to use enrollment criteria; adjustments are allowed.
Benefits	Yes	Organizations are not required to use a benefit; adjustments are allowed.
Other	Yes	Organizations may use additional eligible population criteria to focus on an area of interest defined by gender, race, ethnicity, socioeconomic or sociodemographic characteristics, geographic region or another characteristic.
CLINICAL COMPONENTS		
Eligible Population	Adjustments Allowed (Yes/No)	Notes
Event/diagnosis	Yes, with limits	Only events or diagnoses that contain (or map to) codes in the value sets may be used to identify inpatient stays and diagnoses. Value sets and logic may not be changed. Note: Organizations may assess at the member level (vs. discharge level) by applying measure logic appropriately (i.e., percentage of members who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses who had a follow-up visit with a mental health practitioner).
Denominator Exclusions	Adjustments Allowed (Yes/No)	Notes
Required exclusions	Yes	The hospice and deceased member exclusions are not required. Refer to <i>Exclusions</i> in the <i>Guidelines for the Rules for Allowable Adjustments</i> .
Numerator Criteria	Adjustments Allowed (Yes/No)	Notes
<ul style="list-style-type: none"> • 30-Day Follow-Up • 7-Day Follow-Up 	No	Value sets and logic may not be changed.
